WORK EXPERIENCE

eClerx Services Limited, Pune

Senior Analyst, May 2022 - Jan 2023

- I have extensive experience working in an Agile software development environment.
- Implemented responsive and user-friendly designs, debugging and troubleshooting front-end issues.
- Integrated RESTful APIs into the functional components of the web application.
- The experience I gained can apply to future projects, including project management, problem-solving, technical expertise, and design proficiency.
- Technology Stack - HTML, JavaScript, CSS, and React.js.

EDUCATION

CDAC (Institute of Emerging Technologies)

PG-Diploma, 2021-22

Krishna Institute of Engineering & Technology

B.Tech (IT), 2013-17

PROJECTS

YouTube Clone App

<https://github.com/luckykumar22/Youtube-Clone>

- Built custom categories, responsive channel and video cards, and channel pages for a seamless user experience.
- Implemented video pages where users can play videos directly from the app, view related videos, and see video statistics such as likes and views.
- Integrated RapidAPI to fetch videos from different channels and display them in the app.
- Incorporated a search functionality that allows users to find videos on specific topics or channels.
- Technology Stack - HTML, CSS, JavaScript, React JS.

MERN Blog App

<https://github.com/luckykumar22/MERN-BLOG-APP>

- The app includes functionalities such as registration, login, logout, creating, editing, and deleting posts.
- It covers topics like password hashing, token generation, file uploading, and handling different user roles.
- Technology Stack - MongoDB, Express JS, React JS, Node JS
